PROFESSIONAL EXPERIENCE

Senior IT Infrastructure | Cartrack Technologies Indonesia (Jakarta, Indonesia)

June 2025 – Present

- Provide end-user IT support and remote troubleshooting for hardware, software, operating system, and network connectivity issues.
- Provision laptops for new employees, including operating system setup, application installation, email configuration, and work-access setup.
- Manage antivirus/Endpoint Detection and Response (EDR) operations, review security alerts, apply operating system patches, and investigate security incidents.
- Administer enterprise network infrastructure, including Fortinet and Sophos firewalls, wireless access points, and network devices.
- Maintain on-premises servers and infrastructure; monitor performance and investigate technical issues to support availability and operational reliability.
- Manage IT equipment availability, asset lifecycle needs, vendor coordination, and procurement-related activities.
- Prepare IT operational reports and coordinate with stakeholders and service providers to resolve technical issues.

Senior IT Specialist | InCorp Indonesia (Jakarta, Indonesia)

September 2022 – June 2025

- Administered Google Workspace and Microsoft 365, including user accounts, access permissions, and productivity platform support.

- Provided user support and remote troubleshooting for hardware, software, network connectivity, and internal business applications.
- Managed IT infrastructure including Proxmox virtualization, Cisco Meraki firewalls, and MikroTik network devices.
- Developed and maintained internal web applications to improve business processes and operational efficiency.
- Managed IT asset inventory, device tracking, lifecycle monitoring, and equipment allocation.
- Maintained user access controls and supported security practices across business systems.
- Coordinated IT budgeting, vendor management, infrastructure maintenance, and operational reporting.

Full Stack Developer | PT Prodia Widyahusada Tbk (Jakarta, Indonesia)

March 2022 – August 2022

- Developed and maintained REST APIs and internal web applications using PHP frameworks.
- Performed system testing, bug fixing, deployment, and system integration to maintain application reliability.
- Collaborated with internal teams on application improvements and supported DevOps activities.

Full Stack Developer | DKI Jakarta Government (Jakarta, Indonesia)

November 2019 – February 2022

- Built and maintained government web applications and services.
- Maintained REST APIs, performed system testing, and supported production deployments.
- Collaborated with internal teams to improve application functionality and reliability.
